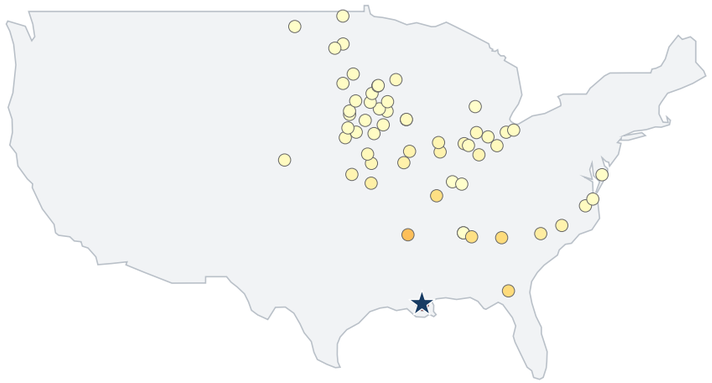
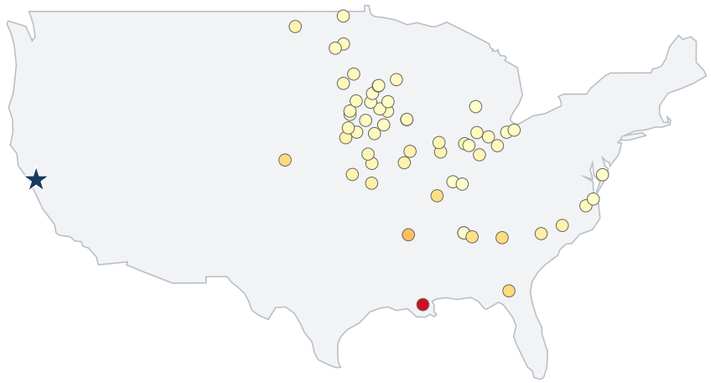
Same +100 million gal/year capacity addition, different refinery locations

Norco, Louisiana



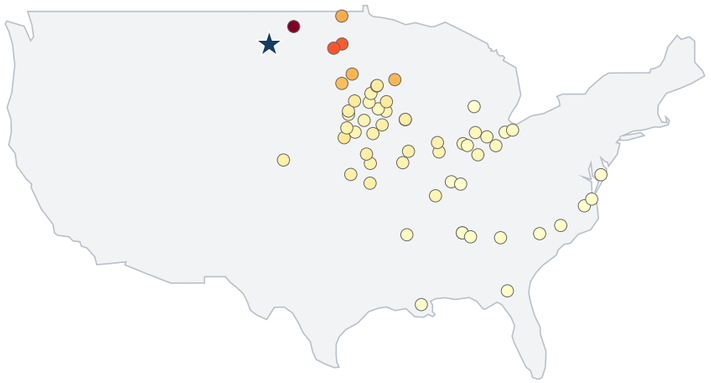
0–75 miles: +43,592 acres
95% CI [-6,878, 94,063]

Rodeo, California

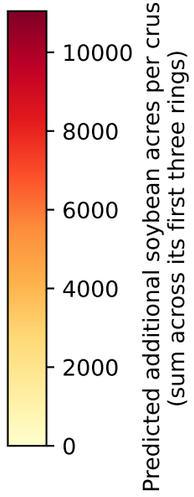


0–75 miles: +50,702 acres
95% CI [-7,875, 109,278]

Dickinson, North Dakota



0–75 miles: +77,029 acres
95% CI [-10,919, 164,977]



★ Refinery location ● Crusher location

All-land share model converted to acres; one-year lag; relative exponential transport-cost decay.
2024 land baseline. Common response coefficients; location-specific mode/cost weights. Potential exposure, not procurement.
Intervals reflect coefficient uncertainty only. Observational scenario predictions; no causal or national extrapolation.
