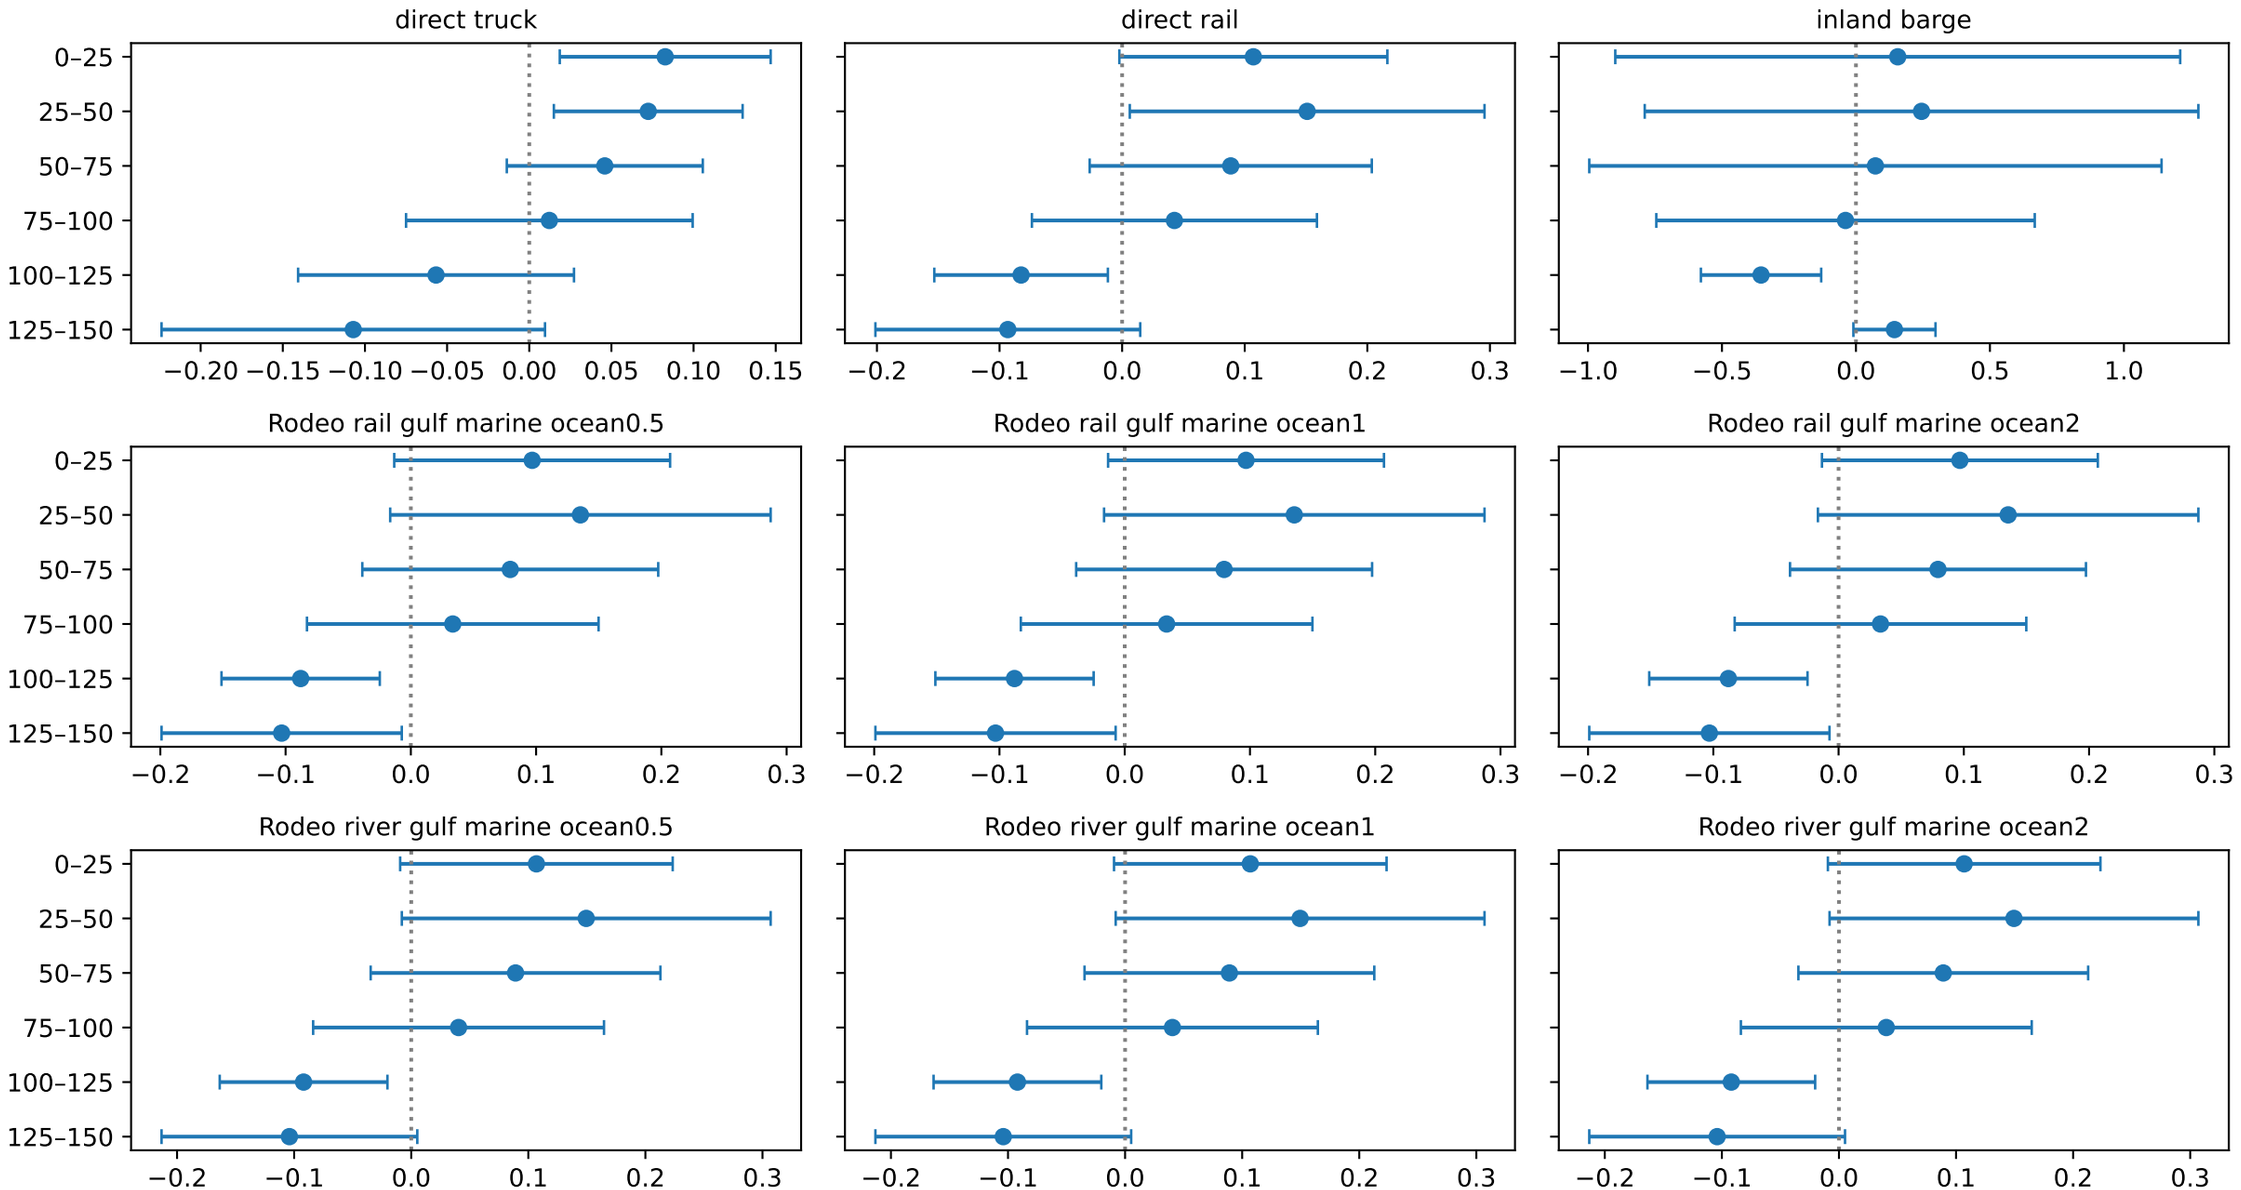
Linehaul cost proxy sensitivity: one-year lag



Soybean-share percentage points per 100 million gal/year exposure

Exploratory TWFE, 2014–2025; crusher-clustered 95% intervals. Linehaul only; excludes handling/access. Multiple testing; not causal.
Relative decay: 100 truck-equivalent km; assumed scale. Bars show percentage-point shift per 100 million gal/year exposure.
